13 new trainees at seele in Gersthofen

Gersthofen, 3, September 2017. 13 new trainees have started their working life at world leading façade specialist seele. They will be trained in jobs like Technical System Designer, Industrial Business Management Assistant, IT Specialist, Metalworker, Machining Technician and Warehouse Logistics Specialist. Also seele's work-study students have started their training to be a future Bachelor of Engineering in façade engineering and project management.

„The first day of starting a new training position is really exciting“, says Andrea Stoll, training supervisor of seele GmbH. „The new trainees start their first day by introducing themselves and getting a warm welcome from the executive management.“ After that a tour through the whole company follows, especially the 30.000sqm production is explained very well. There, façade elements are manufactured to the highest standards. End-to-end digital processes enable every piece to be fabricated as a one-off even on large projects.

seele sets great store by training young people

For more than 30 years, seele has been training its own employees in various professions. Various career opportunities are open to them. The best example of this is Mrs. Stoll, who started as a trainee at seele 30 years ago and today accompanies young people in the technical field until they graduate.

seele group

The seele group of companies, with headquarters in Gersthofen near Munich, is one of the world's top addresses for the design and construction of façades and complex building envelopes made from glass, steel, aluminium, membranes and other high-tech materials. The technology leader in façade construction was founded in 1984 by master glazier Gerhard Seele and steelwork engineer Siegfried Gossner.

Based on a profound understanding of design and materials, seele provides everything necessary for ambitious one-off designs true to the original ideas of engineers and architects. The seele group offers its building sector and industrial customers a complete package of services, ranging from R&D, individual advice and joint conceptual design right up to the planning, detailed design and construction of their projects. seele's own production plants for technologically challenging designs and the group's own erection crews on site provide a guarantee of the very highest quality "made by seele".

About 1,000 employees work at the seele around the world, together generating an annual turnover of more than €200 million.
