

seele cover maintenances – fact sheet

seele cover is changing the face of architecture worldwide using innovative materials and pioneering building envelopes – for sports arenas, airports, swimming pools, shopping centres or even cruise liners. Based in Obing/Germany seele cover is known as an expert when it comes to innovative, sustainable membrane architecture and lightweight plates for new solutions in roof and façade design. Necessary maintenances are, of course, part of our scope of work and will be carried out properly every year.

Advantages of maintenances:

- Guarantee of safety
- Reduction of susceptibility
- Guarantee of functionality
- Increase and optimum benefit of the façade's lifetime
- Preserving of optical conditions

Maintenance contracts with seele cover contain:

- Inspections of membrane cushions, fixing systems and bird protection wires
- Inspection of operational components and the pressure system
- Regular cleaning and replacement of the filter
- Removal of small damages
- Inspection of the control unit and performance of functional tests

Would you like to ensure the optimal condition of your membrane roof or façade? Please contact us (phone: 08624/8969 – 0 or eMail: info.cover@seele.com) for further information. We assume the whole schedule coordination for you.
